

# SINGLE DIRECTION VIBRATING COMPACTOR ZEN

The ENAR ZEN single direction vibrating compactor Series are economical, easy to handle and can easily be transport.

The Enar Zen series are users' number one choice for compacting mixed soil in restricted areas, cohesive materials and paving stones.

## Variety and Efficiency.

The Enar Zen Series offers a range up to 110kg with different engine configuration and options according to the needs of each client.

The Robust and ergonomic handle, the incorporation of wheels to the plate makes it easy to transport to any desired location on the construction site.

## + Transportation easy.

With the incorporation of a wheel set, we've made it easier than ever to transport vibrating plates at the construction site.

## + Full range A variety of models.

The single direction vibrating compactor comes in a complete range of engines for the needs of each client.

## + Robust Resistant.

The base of the Enar Zen Series is made of high quality resistant cast iron to provide a long lasting operational life. It also comes with a heavy duty frame that protects the engine.

## + Ergonomics of use.

The handle is completely foldable on the compactor plate and it included as vibration absorption system to a higher comfort users.

- › Gasoline and / or diesel engines from different manufacturers.
- › Vibration frequency : 5,600 vib/min.
- › Accelerator integrated in handle.
- › Easy start-up, actuation by centrifugal clutch.
- › Optional VULKOLLAN® plate for compacting paving stones.
- › Optional 9L water tank, with quick assembly and disassembly system to facilitate filling. Recommended for working with asphalt.
